

Modernization program at the OP's

Preparations for the new accommodation and watchtower at OP 57

Work in full progress at OP 52

Since September last year OGG OPs have been undergoing a modernization program. On the B-side this program includes the building of a sturdy accommodation, weather protected OP platforms and NBC-protection in the shelters. On the A-side completely new NBC proof shelters

New accommodation OP 72

have been installed on five out of six OP's. New blast walls are being built outside the old ones that are double in height. The projects are well underway and the new accommodations on B-side are scheduled to finish in the beginning of the summer.
